

Connor Hewson Bio

Connor is a member of the Application Science Team at Surface Measurement Systems. He has been using Inverse Gas Chromatography (iGC-SEA), Dynamic Vapour Sorption (DVS) and Vacuum techniques to characterise thermodynamic properties and sorption kinetics of powders, fibres, porous materials, and films. Connor obtained his Master's Degree in Chemistry from Nottingham University in 2019. Upon graduation he has worked as a R&D Chemist for a company specialising in suspension polymerisation of methacrylates and as a Quality Control Chemist for Europe's largest e-liquids producers. He now specialises in Sorption Techniques.
